Different types of Scissors

Easi-Grip and Mini Easi-Grip Scissors

Two thirds of the size of standard Easi-Grip® Scissors the Mini Easi-Grip® Scissors are ideal for Early Years scissor skills development or for special needs due to weak hands or small hands. Both adult and child versions can in most cases can be used in either left or right hand.

Long Loop Easi-Grip Scissors

Long Loop Easi-Grip® Scissors are ultra light-weight self-opening scissors with the added benefit of a long loop handle for additional stabilisation. Designed for use by those with weak hands and wrists or those who are unable to use conventional style scissors due to swollen and painful joints.

Long Loop Scissors

Our Long Loop Scissors have been designed with an extended loop to give increased strength and control over the cutting action. Assists children with poor motor control, including those with Dyspraxia and similar conditions

Long Loop Self-Opening Scissors

Long Loop Self-Opening Scissors have been designed with an extended loop to give increased strength and control over the cutting action with the added benefit of a discreet spring which automatically reopens the scissors, allowing the child to concentrate on manipulating the paper and directing the cut.

Child Self-Opening Scissors

Conventional style scissors with a hidden spring that will force the blades back to an open position after the grip has been eased. Our Child Self Opening Scissors are ideal for children in a mainstream setting who need some extra assistance when using scissors

Standard Left Hand Scissors

These standard left hand scissors have a wide finger contact area which makes them comfortable to use when cutting out paper and thin card. Ideal for use at home or school.

Dual Control Teaching Scissors

Our Dual Control Teaching Scissors have been developed under consultation with Occupational Therapists to assist a child who has poor eye hand co-ordination, lacks the strength to complete the cutting action, has a shaky hand and cannot place the scissors at a given starting point.

Specialist Scissors

Push Down Table Top Scissors

The Push Down Table Top Scissors are easy to use, simply requiring a pushing down action on the “T” shaped handle. The spring will automatically reopen the scissors once the pressure is released. Can be used either by maintaining the paper in a fixed position and “scooting” the scissors along with each cutting action; or by keeping the scissors stable (a Dycem® mat can help with this) and moving the paper towards the scissors.

Mounted Table Top Scissors

The Mounted Table Top Scissors are designed for use by those with very limited strength and control, or for use one-handed. Simply push the paper or card along the base until in position, then push down the “T” shaped handle to cut. The hidden spring will automatically reopen the blades in readiness for the next cut. It is often advantageous to use the more dextrous hand to manipulate the paper whilst the more affected hand works the scissors. The mounted table top scissors come with a choice of base. The wooden base with Dycem® strips for ultimate stability, or the plastic base with rubber feet, which is lightweight, yet stable.
