Left Handed Spring Loaded Scissors

These sturdy, lightweight left handed scissors for children with brightly coloured plastic moulded grips and stainless steel blades are an ideal junior scissor. These spring assisted scissors open automatically when pressure is released, making them a good option for children with limited use in arm or poor hand strength. These left handed scissors have the blades reversed with the left blade on top so you can see your cutting line without twisting the scissors. That gives you a clean and straight cut using the scissors in your left hand.
