The Ergonomic Pencil Grip

Revolutionary design to immobilise the index finger, ideal for younger children just starting to write. The tripod angle re-enforces the correct positioning of the fingers. It relieves hand pain, reduces fatigue, and improves comfort. Also suitable for long periods of intensive writing, such as exams. These are usually sold as a pack of three grips.

These are available to purchase online from a variety of suppliers including: www.tts-group.co.uk,
www.amazon.co.uk www.cheapdisabilityaids.co.uk
www.thedyslexiashop.co.uk
