Velcro Adapted Clothing

Velcro is a great way of adapting standard clothing to increase independence with dressing. The garments we most commonly suggest adapting are items such as school ties, trousers and school shirts. The photos above show how simply sewing on pieces of Velcro to the areas on the garments where a standard fastening would be e.g. buttons on a shirt can be replaced with Velcro.

Supplier

Velcro is available from a variety of suppliers such as:

www.amazon.co.uk

www.hobbycraft.co.uk

www.hookandloop-direct.co.uk
