## Second doses...

The 1st dose of Covid vaccine provides estimated 25-36% protection against the Delta variant, protecting against being symptomatic. The 2nd dose raises the level of protection up to 77-82%. Therefore it is important that you receive both doses of the Covid vaccination for maximum protection.

We are currently vaccinating those aged 35-39 years with their 2nd dose and those aged 30-34 years will start to receive their 2nd dose invite over the next few weeks.

Anybody over the age of 40 years will have an 8 week interval between their vaccines.

If you received your 1st dose of Pfizer between 7th December 2020 – 30th April 2021 and not yet received your invite for your second vaccine, please complete the following form on our website:
