

Freedom of Information Request	FOI 21-153	15 <sup>th</sup> April 2021
--------------------------------	------------	-----------------------------

- 1. I would like to know how many people have died your hospitals from COVID19 alone? As in they died only due to COVID19. I can see that the figures that you publish online, but these are deaths within 28 days of a positive covid test, so they could have died from other causes. I just want to know the exact figure from 1<sup>st</sup> February 2020 until the 26<sup>th</sup> march 2021 of people that have died due to COVID-19 and not anything else please**
- 2. The percentage & number of people with 'underlying health conditions' in the overall total,**
- 3. The percentage & number of those without underlying health problems**

The Health Board reports every death in our hospitals to Public Health Wales (PHW), this includes all causation factors. Public Health Wales will then perform statistical alignment meeting the definition of a COVID death and the patient place of residence as some of the Health Board area residents may die in other hospitals outside of the Aneurin Bevan Health Board responsibility. All Health Board deaths data is reported on the Public Health Wales website and in the Office of National Statistics (ONS) data.

Please refer to PHW website and PHW for further information via the following link below:
