

Freedom of Information Request	FOI 21-157	20 th April 2021
--------------------------------	------------	-----------------------------

Could we get daily figures – since the vaccination programme was opened up to priority groups 5-9 – for:

- The number of vaccine doses administered;**
Daily and weekly data on the number of people who have received vaccinations is published on the Public Health Wales (PHW) surveillance dashboard available at:
<https://phw.nhs.wales/topics/immunisation-and-vaccines/covid-19-vaccination-information/about-the-vaccine/>
- The number of people who have failed to turn up to their appointment (without notifying the centre/surgery beforehand);**
The average DNA rate across the programme since launching in December 2020 is 7.7% and relates to all priority groups vaccinated to date.
- And, the number of vaccine doses wasted.**
Welsh Government publish data in relation to vaccines unsuitable for use, and this is available at: <https://gov.wales/covid-19-vaccination-programme-stock-and-distribution-11-april-2021>
