

I would be grateful if you could please answer these questions relating to the usage of Dabrafenib + Trametinib in cancer treatment.

A) Over the previous 6 months, how many patients for the following diseases have been treated with a combination of Dabrafenib + Trametinib:

i) Metastatic Melanoma

ii) Adjuvant Melanoma

iii) BRAF mutated Lung Cancer

The use of Dabrafenib and Trametinib in cancer treatment is a commissioned service provided by Velindre NHS Trust (VNHST) for patients served by Aneurin Bevan University Health Board, and that the request would need to be made to them.

I have provided the email address for submitting the Freedom of Information request to VNHST.
