

Freedom of Information Request	FOI 21-301	3 rd August 2021
--------------------------------	------------	-----------------------------

Please can you provide me with the following:

PCR Testing Cycles from the start of pandemic until now per hospital

COVID test values up to 35 are reported as positive

COVID test values 35-40 are reported as low level detected

COVID test values over 45 are reported as indeterminate

Can you provide signed documentation to authenticate your claim?

The Health Board does not have any claims as this is the policy requirement.

I also ask that you share figures on how many vaccines have been administered, alongside any deaths or adverse reactions. The ones publicly available are on only available due to the person consenting, so I would like to view all numbers for your Aneurin Bevan Health Board.

Data on the numbers of vaccine administered by the Health Board is published by Public Health Wales on the following website:

<https://public.tableau.com/app/profile/public.health.wales.health.protection/viz/RapidCOVID-19virology-Public/Headlinesummary>

There have been no reported deaths in the Health Board associated with COVID vaccine administration. Adverse drugs reactions are collated nationally through the Coronavirus Yellow Card reporting system_ <https://coronavirus-yellowcard.mhra.gov.uk/> and therefore local data is not held by the Health Board. There is no requirement for health care professionals to require patient consent when submitting such information and members of the public may also report through this system.
