

We are looking for some accurate statistics of coil (both copper & hormonal) waiting times within health boards around the UK. If you could please share any accurate data on your coil waiting times with us, that would be very much so appreciated.

The Health Board's Sexual and Reproductive Health service currently has no waiting list for IUD or IUS. Patients are able to call and book an appointment for 2-3 weeks time from the day that they call the service.

The Health Board does not hold information on waiting times within Primary Care, therefore you would need to contact each individual GP practice.
