

Freedom of Information Request	FOI 23-650	8 th December 2023
--------------------------------	------------	-------------------------------

Your Request

You requested the following:

We would like to have the data please to show how many people (all ages) were seen in a&e following Trampolining accidents in the 12 months (1st January to 31st December) of the following years:

2016
2017
2018
2019
2020
2021
2022

Was there a breakdown in how serious the accidents would have been - and if so, is this available in data format?

Lastly, is there a breakdown of whether these accidents were on garden trampolines, trampoline clubs or trampoline parks please? If so, could we have the breakdown showing this please?

Our response

We have searched our records and confirm that there is no formal category to classify accidents directly associated with trampolines and we are therefore unable to provide conclusive data which includes seriousness or locations for these presentations. However, the table below provides the number of attendances at an Emergency Department or Minor Injury Unit where the terms 'trampoline' or 'trampolining' is mentioned within the triage notes.

Please note that the Grange University Hospital opened in November 2020 and therefore, no data is available prior to that date.

Year	Number of patients				
	Grange University Hospital	Royal Gwent Hospital	Ysbyty Ystrad Fawr	Nevill Hall Hospital	Ysbyty Aneurin Bevan
2016	-	236	125	31	16
2017	-	160	160	87	18
2018	-	226	155	69	13
2019	-	217	134	74	33
2020	2	163	63	56	17
2021	152	129	96	89	27
2022	122	193	101	89	29
