

Freedom of Information Request	FOI 21-027	5 th February 2021
--------------------------------	------------	-------------------------------

A copy of a policy/guidance document for the administration of a drug called GTN by Infusion. The document should include where the drug should and should not be used, the dosages and the monitoring that should take place once it has been administered. I believe this document should be openly available to the public.

Please find attached a copy of our Patient Information Leaflet
