

Freedom of Information Request	FOI 23-017	17th February 2023
--------------------------------	------------	--------------------

Our service covers this health board and to date we have experienced great difficulty in identifying beneficiaries for our service. We are the Royal British Legion Admiral Nursing Service South Wales and I have attached our leaflet for your reference.

I have just been researching NHS Digital and have found for England they have published figures

- 1. Observed prevalence of recorded dementia by age group and gender, England, September 2022**
- 2. Dementia: 65+ estimated diagnosis rate, by organisation of responsibility, England, September 2022**

Is there a similar document for Wales? I am looking for age prevalence and dementia prevalence for Aneurin Bevan University Health Board so that we can support carers in their role of supporting their loved ones living with dementia.

The Health Board does not hold this information but can advise that the information requested is derived from GP case registers and is held by [Public Health Wales](#) who can be contacted via the link.
