

**I would like to please request the following information, with regards to treatment of Epilepsy in your trust/ board.**

**In the last 12 months of available data:**

**1a. What number of unique patients have been treated for Lennox-Gastaut syndrome, Dravet Syndrome and Tuberous Sclerosis Complex? Please give answers for each condition separately.**

Please find below the number of inpatient or daycase patients treated in the Health Board from November 2021 to October 2022:

**Lennox-Gastaut Syndrome**

G40.4 (Other generalised epilepsy and epileptic syndromes)

12 patients

**Dravet Syndrome**

G40.8 (Other epilepsy)

4 patients

**Tuberous Sclerosis Complex**

Q85.1 (Tuberous Sclerosis Complex )

6 patients

Please note to identify the patients ICD10 diagnosis codes have been used. Not all the codes are specific or unique to the conditions specified in the request and therefore the codes selected may include other types of epilepsy. The primary diagnosis is the main condition treated or investigated during an episode of healthcare.

**1b. For each indication (Lennox-Gastaut syndrome, Dravet Syndrome and Tuberous Sclerosis Complex), what number of these have been treated in a paediatric environment?**

As per Q1a the following patients were treated under the specialty of Paediatrics

**Lennox-Gastaut Syndrome**

G40.4 (Other generalised epilepsy and epileptic syndromes)

8 patients

**Dravet Syndrome**

G40.8 (Other epilepsy)

2 patients

**Tuberous Sclerosis Complex**

Q85.1 (Tuberous Sclerosis Complex )

5 patients

**2a. How many patients have been treated with Epidyolex in a paediatric environment?**

The Health Board does not use Epidyolex for patients under the age of 18

**3a. Can you please detail which NHS Trusts/ Health Boards these patients have been referred from?**

Not applicable.
