16th February 2023

**Can you please advise me on the wait times for Laparoscopic Cholecystectomy surgery in the area.**

| <b>Month</b> | <b>Average weeks wait</b> | <b>Median weeks wait</b> | <b>Shortest weeks wait</b> | <b>Longest weeks wait</b> |
|--------------|---------------------------|--------------------------|----------------------------|---------------------------|
| November     | 41                        | 49                       | 3                          | 117                       |
| December     | 38                        | 27                       | 5                          | 121                       |

Please note waiting times for treatment is not something that is reported routinely. The figures have been calculated by looking at patients who had a laparoscopic cholecystectomy in November/December 2022 and calculating how long they had waited from being added to the inpatient/daycase waiting list.
