

1. What is the name of the main IT Solution used within the Emergency Department setting?

'An Emergency Department Information System (EDIS) is an extended EHR system used to manage data in support of Emergency Department patient care and operations. The functions of an EDIS may be provided by a single application or multiple applications.'

For example: Symphony, DXC EDIS

EMIS Symphony

2. What is the name of the PAS your Health Board currently has installed?

'Patient Administration Systems (often abbreviated to PAS) developed out of the automation of administrative paperwork in healthcare organisations, particularly hospitals, and are one of the core components of a hospital's IT infrastructure.'

For example: Servelec Rio, System C Medway

WPAS (NHS Wales internally developed system)

3. What is the name of the Main Community Solution, used for Community and District Nursing?

For example: TPP SystemOne, Advanced CareNotes, Servelec Rio

The Health Board has a contract with Advanced to implement Care Director, known in Wales as Welsh Community Care Information System (WCCIS)

4. What is the name of the Clinical Noting Solution used within the Health Board?

'Clinical Noting Solution is fully-auditable electronic notes platform that allows clinicians to search, analyse and annotate patient case notes.'

For example: G2 Speech, Meditech, DXC Lorenzo

The Health Board has a number of solutions which integrate with Clinical Workstation (CWS –developed internally by the Health Board). The Health Board uses G2 Speech Report which is integrated with a locally developed clinical document system (MEDSECS) and documents are available to view as part of the clinical record in CWS

5. What is the name of the Health Board's EPR Solution?

'EPR (electronic patient record system) will mean all patient information will be available electronically, on screen, at any hospital location, at any time.'

For example: DXC Lorenzo, Servelec Rio, System C Medway

The Health Board uses several EPR's but has a portal - Clinical Workstation (CWS) which has been developed in-house.

- 6. What is the name of the Pharmacy Stock Management Solution used within the Health Board?**
'Pharmacy inventory management involves the processes of ordering, receiving, and storing drugs, with the aim of ensuring drug availability while keeping costs down and working within storage capacity constraints'
For example: EMIS, JAC
 WellSky. An NWS Wales procurement under all Wales programme (WPMMS)
- 7. What is the name of the In-Patient e Prescribing solution used within the Health Board?**
'E-prescribing, or electronic prescribing is a technology that allows physicians and other medical practitioners to write and send prescriptions to a participating pharmacy electronically instead of using handwritten or faxed notes or calling in prescriptions.'
For example: Meditech, EMIS, Cerner Millenium
 None currently – The Health Board is engaged in the NHS Wales National Programme to implement an All Wales Solution
- 8. What is the name of the Out-Patient e Prescribing solution used within the Health Board?**
'E-prescribing, or electronic prescribing is a technology framework that allows physicians and other medical practitioners to write and send prescriptions to a participating pharmacy electronically instead of using handwritten or faxed notes or calling in prescriptions.'
For example: Meditech, EMIS, Cerner Millenium
 None currently – The Health Board is engaged in the NHS Wales National Programme to implement an All Wales Solution
- 9. What is the name of the Order Communication Solution used within the Health Board?**
'Order Communications System (OCS) allows diagnostic tests and treatment services to be ordered instantly.'
For example: Sunquest ICE, Civica Paris
 The Health Board uses Welsh Clinical Portal (NHS Wales developed System) for pathology test requesting which connects to the national LIMS system. Radiology examinations in secondary care are requested via the Health Board developed Clinical Workstation (CWS)
- 10. What is the name of the Diagnostic Reporting Solution used within the Health Board?**
'Electronic requesting and results reporting service, a web-based requesting and result reporting system that has been designed to operate within primary and secondary care. Usually used for Radiology, Cardiology and Laboratory reporting'
For example: CliniSys Cyberlab, EMIS Review, DxC RadCentre, GE PACS, In-House
 Results reporting service is available via the Health Board locally developed Clinical Workstation (CWS) from a range of diagnostic source systems including Radiology, Pathology and Endoscopy
