

Freedom of Information Request	FOI 21-552	7 <sup>th</sup> January 2022
--------------------------------	------------	------------------------------

**1. How many patients suffering from Covid 19/Coronavirus were transferred from the Grange in Cwmbran to YYF in Ystrad Mynach between the 1<sup>st</sup> January 2021 and the 30<sup>th</sup> November 2021.**

164 COVID positive patients were transferred from Grange University Hospital (GUH) to Ysbyty Ystrad Fawr (YYF) in the above period.

Please note, this figure includes patients who may have been admitted to other hospitals before being transferred to GUH i.e. GUH may not have been their first hospital and also patients who may have been transferred to other hospitals after being discharged from YYF i.e. YYF may not have been their last hospital. The figure also includes patients who were transferred from GUH to YYF multiple times during their provider stay (but these patients have only been counted once). However, all 164 patients have been transferred from GUH to YYF at some point during their provider stay.

**2. How many of the patients transferred during this period died and how many survived and were discharged.**

Of the patients whose last hospital in their provider stay was YYF (145), 40 died due to either COVID or non-COVID reasons.
