Please could you advise of how many patients in the Royal Gwent Hospital have covid as of today's date 09/01/22. Of these please can you advise how many are in ICU, the age ranges of these persons (i.e. 2 people 18-35) and how many are unvaccinated/double vaccinated or received 3 vaccines.

As at 09/01/2022, there were six COVID positive patients in the Royal Gwent Hospital. None of these patients were in ICU because there is no ICU in the RGH.

I can confirm that 5 of these patients had received 2 or more vaccinations.
