

Freedom of Information Request	FOI 22-321	20 th July 2022
--------------------------------	------------	----------------------------

I am asking for a summary of your involvement with patients & staff at Hillview Hospital/Regis Healthcare since 2018.

This would include at least counts of calls, attendances, admissions, referrals, but you may have also produced your own reviews of the health board's involvement with this private hospital/organisation in this time.

To be clear: My request for information does not extend to anything that might identify an individual - it does not extend to 'personal data', only information about the site as a whole. (Compare with request for information about ambulance call outs to Amazon warehouses, or HIW's public reports on services, etc.)

Hillview is a private inpatient health facility/provider that is commissioned by the NHS in England and Wales on a case-by-case basis. This is managed by the [NHS Wales National Collaborative Commissioning Unit](#).
