

Thank you so much for the information you have given me about hand hygiene in Aneurin Bevan. By looking at the information I have realised that I should have asked for figures for January - March 2021 as well to make a real comparison for the start/middle/current situation of the coronavirus pandemic.

If it is not too inconvenient, would it be possible for me to have the figures for January to March 2021?

Please find below hand hygiene compliance for January to March 2021:

Month	%
January 2021	93
February 2021	91
March 2021	92
