

Freedom of Information Request	FOI 22-539-01	16 th January 2022
--------------------------------	---------------	-------------------------------

We would respectfully request that if you are able to update the public facing webpage with the approved formulary status at the earliest opportunity that would be greatly appreciated, this is so that clinicians have the assurance to initiate treatment for eligible patients in line your guidance following the NICE being published on 13th July 2022, some 183 days ago.

As per the rules pertaining to the Freedom of Information Act, I am writing to you to request the following information,

- **By when will the formulary be updated with the Icosapent Ethyl listing?**

The Health Board can confirm that Icosapent Ethyl has now been added to the formulary as red and the NTF spreadsheet updated accordingly.
