

I'd be grateful if you could provide me with details of which hospital(s) within your trust area:

1. Have medical staff/surgical team trained to carry out bloodless surgery.

No

2. Have autologous blood transfusion and patient's own cell salvage equipment available.

The only autologous transfusion available within Aneurin Bevan University Health Board (ABUHB) is through cell salvage. This is available at, St Woolos, Royal Gwent Hospital (RGH) and the Grange University Hospital (GUH).

3. Keep stocks of synthetic blood transfusion substitutes.

This is not available with Aneurin Bevan University Health Board (ABUHB).
