I would like to know how many people have died in your hospitals from Covid-19 alone. I can see the figures that you publish online, but these are deaths within 28 days of a positive test, so they could have died from other causes. I just want to know the exact figure from 1st February 2000 until the present day, of people who have died due to Covid-19 and not anything else please.

The Health Board reports every death in our hospitals to Public Health Wales (PHW), this includes all causation factors. Public Health Wales will then perform statistical alignment meeting the definition of a COVID death and the patient place of residence as some of the Health Board area residents may die in other hospitals outside of the Aneurin Bevan Health Board responsibility. All Health Board deaths data is reported on the Public Health Wales website and in the Office of National Statistics (ONS) data.

Please refer to PHW website and PHW for further information via the following link below:
