

Freedom of Information Request	FOI 21-266	30 th June 2021
--------------------------------	------------	----------------------------

This has been recommended to me by NHS Informatics, as they have been unable to access some information.

I am litigating against a Consultant Oncologist (based at Velindre) who told me she was referring me for a lifesaving hysterectomy, but then didn't and wrote something completely different in the notes.

I didn't get my life saving hysterectomy and I am terminally ill as a result of this neglect.

I understand that there is a policy in place to prevent Consultants making this sort of glaring error in light of various inquiries into Shipman etc.

I need a copy of this policy-it will be something like an MDT policy for cancer patients

The Health Board does not have a policy specifically for this instance. However, we have a procedure managed by the Multi-Disciplinary Team which is attached.

Also please find attached our Records Management Code of Practice and Clinical Record Keeping Policy.

For Velindre University NHS Trust specific information you will need to contact them direct via the following link: [Freedom of information - Velindre University NHS Trust](#)
