

Freedom of Information Request	FOI 21-027-02	8 <sup>th</sup> March 2021
--------------------------------	---------------	----------------------------

**I'm looking to obtain a copy of a policy/guidance document for the administration of a drug called GTN by Infusion. The document should include where the drug should and should not be used, the dosages and the monitoring that should take place once it has been administered. I believe this document should be openly available to the public. This drug is normally used to treat heart conditions, angina and control high blood pressure.**

As stated in our response on 23rd February 2021 the Health Board does not have a specific for the administration of GTN by Infusion. However, following the response you stated that you had had sight of a document at a meeting in December 2020 with Roxanna Williams. We have contacted Roxanna Williams who advised the meeting of 16th December 2020 was in relation to a current complaint with Health Board and the document referred to at that meeting was 'BP Guidelines after stroke'. I can confirm that this document refers to GTN infusion but it is not a specific document for the administration of GTN infusion which you requested. Roxanna has further advised
