**Last year at a meeting with staff at Betsi Cadwaladr University Health Board a presentation was made of a computer system called 'My Medical Record' 'PSA Tracker. At that meeting approval was agreed to obtain the system but no further progress has been made to get the system implemented here. I am therefore trying to persuade the Health Board and Welsh Government to get the system implemented as soon as possible. I understand that such a system is in place at Aneurin Bevan University Health Board and would be grateful if you could confirm that that this is correct and if so whether it is working satisfactorily. Perhaps you could also give me an indication of what it cost to install**

Aneurin Bevan University Health Board has not yet implemented a system, although we are working on a proposal based on local need as was the case in Betsi Cadwaladr University Health Board.

We are waiting potential approval before working towards a programme of development and implementation.

However, obviously, there has been delay because of the priorities of the response to COVID and Mass Vaccination.

Therefore, at the moment the Health Board has not implemented the PSA Tracker system.
