

Freedom of Information Request	FOI 22-144-01	19 <sup>th</sup> May 2022
--------------------------------	---------------	---------------------------

**Q1 In response to my first question, 'how many people are currently receiving support from ABUHB's post-covid recovery team for long covid', I was told that there were 99 people on the waiting list and 115 on the follow-up list.**

***Does this mean that the post-Covid recovery team currently is not supporting any patients, or is it that the post-Covid recovery team's role is only to forward patients on to other services? Some clarity on this would be appreciated.***

The Health Board has a multidisciplinary team who are directly involved in the treatment of patients (114 in total to date).

**Q2 Additionally, in response to my second question, 'how many people have received support from ABUHB's post-covid recovery team for long covid' since April 2020, I was provided with a breakdown of total patient numbers from the core Covid recovery service, post-ITU rehab and education patient programme.**

***Would it be possible to get some more information on what the roles of each of these services are and what they actually entail?***

The services include Neurology, Cardiology, Respiratory, Physiotherapy, Exercise Referral, Psychology, Occupational Therapy interventions. These are delivered in one-to-one sessions. Sessions are tailored to a patient's individual circumstances and health condition. Development is also underway to establish group programmes. Please see attachments for further information and a link to briefing paper included in the Health Board's Board Papers.
