Since 2016 to date how many patients have been admitted to Ysbyty Aneurin Bevan Hospital Ebbw Vale
(1) what were there age of these patients.
$A=25 / 40$
$B=41 / 56$
$C=57 / 66$
$\mathrm{D}=67 / 75$
$E=76 / / 93$
$F=94 / 99$
Out of the number of admissions and associated age range above what was the mortality rate by \%

## Example

In 2016 there were 1000 admissions. 500 between age range A, 300 age range $B$ and 200 age range $E$ out of these 1000 patients how many died?

Please can I have this as a year on year analysis from 2016 to date.
In addition please can $I$ have the mortality rate within $\mathbf{3}$ months if discharge

Please find the information requested in the attached spreadsheet.

| Year | Age Range | No.of Admissions | No.of Deaths | Mortality Rate | No.of Deaths Within 3 Months of Discharge | Mortality Rate Within 3 Months Of Discharge |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
