

Freedom of Information Request	FOI 22-519	9 th November 2022
--------------------------------	------------	-------------------------------

I would like to make a Freedom of Information and ask the following questions about your health board please?

The Health Board does not hold this information, it would be held at practice level, therefore we would advise that you contact each individual practice directly.

- 1. What proportion of GP practices are doing spirometry themselves for annual respiratory reviews?**
- 2. What proportion of GP practices are doing spirometry themselves for breathless patients without a diagnosis?**
- 3. What proportion of patients on asthma and COPD registers have spirometry documented in the last 3 years?**
