

Freedom of Information Request	FOI 21-394	14 th October 2021
--------------------------------	------------	-------------------------------

1. Number of children (under 16) who have passed away because of Covid-19.

The Health Board reports every death in our hospitals to Public Health Wales (PHW) this includes all causation factors. Public Health Wales will then perform statistical alignment meeting the definition of a COVID death and the patient place of residence as some of the Health Board area residents may die in other hospitals outside of the Aneurin Bevan Health Board responsibility. All Health Board deaths data is reported on the Public Health Wales website and in the Office of National Statistics (ONS) data.

Please refer to PHW website and PHW for further information via the following link below:

<https://public.tableau.com/profile/public.health.wales.health.protection#!/vizhome/RapidCOVID-19virology-Public/Headlinesummary>

2. Number of children (under 16) who have had a positive Covid-19 result as confirmed by yourselves.

There have been 2,228 people (children under the age of 16) who have had a positive test for COVID-19. To be clear (and for the avoidance of doubt), not all of these people will have required a hospital admission (see next question). Refer to above link

3. Number of children (under 16) who have been admitted to hospital due to Covid-19.

There were 76 patients (children under the age of 16) who were admitted to any hospital within ABUHB with a positive COVID-19 test. To be clear (and for the avoidance of doubt), they tested positive prior to them being admitted to hospital i.e. COVID-19 was 'community acquired'.

4. Number of children (under 16) who have been admitted to ICU due to Covid-19.

None of these patients (children under the age of 16) who were admitted were admitted to critical care.
