

See on Symptoms

Dermatology Department

What is See on Symptoms?

See on Symptoms patients do not have a set date for a routine appointment. Instead, they can contact the Dermatology Unit **within six months** if their condition flares. If your skin disease is becoming unmanageable or your treatment is not working, we will arrange for you to be seen in the next available clinic appointment.

Please note - It is not an emergency service.

Will I still be able to see my GP about my skin disease?

Yes, you can still see your GP and also obtain ongoing supplies of your current creams/ointments as required. The Dermatology department do not provide a repeat prescription service for your creams/ointments.
